How Do Employers Find You in VOS?

You must complete a résumé – This allows system-registered employers to search for, view, and maintain your résumé as part of their account information in Virtual OneStop. Employers may choose the following résumé search options to find you:

- **Quick Search** – uses multiple-combination criteria such as your desired work location, occupation, and salary; keywords found in your résumé's title or employment history section; minimal education requirements; or the résumé posting date.
- **Advanced (Résumé Ranking) Search** – offers various search criteria for employers to choose from, such as occupational experience, driver's license info, and shift availability. Based on whether the employer requires or desires the criteria, the system will display matching résumés, in ranked order, for the employer to review.
- **Résumé Search by Skills** – employers search for individuals whose job skills match a required job skill set by a pre-determined match ratio (usually 70%, 50%, or 25%).
- **Résumé Search by Job Order Criteria** – employers may find candidates using requirements from one of their job orders, such as desired work location, occupation, salary, and work experience.

Note: To get employers' attention, create résumé titles that reflect your desired occupation, because employers can, and frequently do, use keyword searches.

- To create a résumé, click **Résumé Builder** from the Quick Menu.
- To review résumé writing tips, click **Job Seeker Services ▶ 10 Steps**.

Note: Make sure that you complete the 2nd résumé step for "Employer Searchable Items" so employers can find you when searching by those items. If you use a Quick creation method, those items are not captured.
